

# AEM Energy — Homepage Change Request

Developer handoff. Prepared from the 11 supplied homepage screenshots. Every change is keyed to the client's Home number and the on-screen section heading. Marked-up screenshots follow the summary tables — build straight from the boxes and legends.

## Colour key (used on every marked-up screenshot)

|                    |                                                  |
|--------------------|--------------------------------------------------|
| DELETE /<br>REMOVE | Element is removed entirely.                     |
| MOVE /<br>REORDER  | Element stays but changes position or order.     |
| ADD / RESTYLE      | Element is added, kept-but-changed, or restyled. |
| BEHAVIOUR          | Interaction, animation or reveal behaviour note. |

## Global rules (apply across every section)

- **Re-fit on every change.** After any add or removal, re-adjust the section's layout, spacing and background/container size so nothing is left cramped or with an empty gap.
- **Remove 'Aussie Eco Marks' everywhere.** AEM Energy is an independent Accredited Person in its own right. Replace any 'Aussie Eco Marks' wording with that. Appears in Home 4, 5, 6, 8 and the footer.
- **Logo + motto.** Enlarge the logo so it reads as a foreground element (not a faint background). Remove the 'RENEWABLE ENERGY COMPANY' motto text everywhere it appears (top nav and footer lockup).
- **Slide-in reference.** The hero uses a left-side cutout so the background photo never sits behind the headline text. This same cutout technique is the reference for the Home 5 and Home 6 background slide-ins.
- **Single Products page.** Products are identical for residential and business, so there is one Products page for both. It is filtered by state (VIC / NSW); if no state is selected, the page prompts the user to choose one before showing rebate figures.

## Final homepage order (top to bottom)

| 1 | Hero                                             | Home 1  | revised                 |
|---|--------------------------------------------------|---------|-------------------------|
| 2 | One team owns the whole upgrade (Why AEM)        | Home 5  | slide L → R             |
| 3 | Accredited installers. Real, tidy work.          | Home 6  | slide R → L             |
| 4 | Residential & Business info (was 'who are you?') | Home 2  | made informative        |
| 5 | We assess / install / paperwork / you save       | Home 4a | scroll-reveal (ref: 4b) |
| 6 | 'Accredited' should mean something               | Home 8  | kept — see confirm note |
| 7 | Find out what you qualify for                    | Home 9  | unchanged               |
| 8 | Footer                                           | Home 10 | revised                 |

**Removed from homepage:** Home 3 ('Where does the money come from', deleted sitewide) and Home 7 (calculator, moved to the Products page below the listing — never on an individual product page). Home 4b ('Leading Sustainable Energy Solutions') is a developer reference image, not a live section.

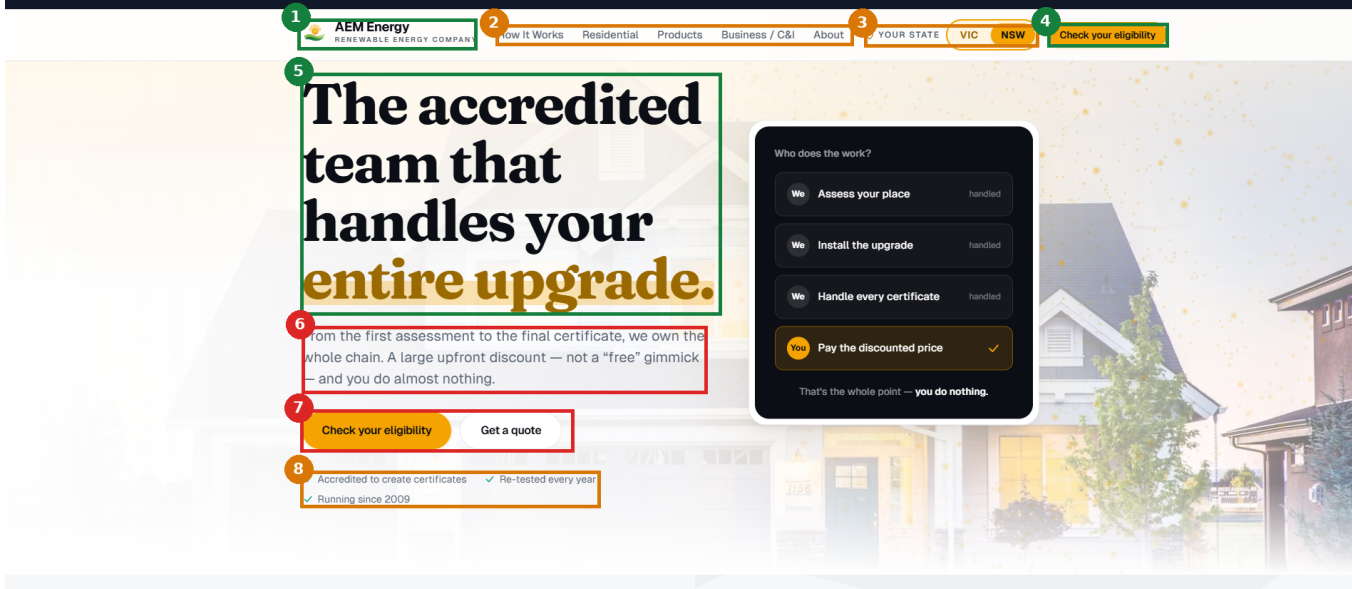

**Confirm before build:** Home 8 was earlier flagged for deletion as a footer duplicate, but the client's final order keeps it. It is built as KEPT. Raise with the client if that was not intended.

## Home 1 — Hero

|             |              |                                                                                                                               |
|-------------|--------------|-------------------------------------------------------------------------------------------------------------------------------|
|             |              |                                                                                                                               |
| ADD/RESTYLE | Logo         | Enlarge to foreground size; remove 'RENEWABLE ENERGY COMPANY' motto text.                                                     |
| MOVE        | Nav items    | New order after State toggle: Home, Products, About Us, FAQ's, How It Works. Remove Residential & Business/C&I; as nav items. |
| MOVE        | State toggle | Move to sit first, immediately after the logo (state chosen before anything else).                                            |
| ADD/RESTYLE | Buttons      | Keep 'Check your eligibility'; add new 'Get a quote' beside it. Both live only in the nav.                                    |
| ADD/RESTYLE | Headline     | Set on two lines; move the three trust ticks to directly below it.                                                            |
| DELETE      | Subheadline  | Delete the paragraph entirely.                                                                                                |
| DELETE      | Hero buttons | Remove — now in the nav.                                                                                                      |
| MOVE        | Trust ticks  | Move to below the two-line headline.                                                                                          |

### HOME 1 — HERO SECTION

Final order position: 1 of 8 (stays first)

#### CHANGES ON THIS SCREEN

- LOGO: enlarge it so it reads as a proper foreground logo, not a faint background element. REMOVE the 'RENEWABLE ENERGY COMPANY' text under the wordmark (it looks like a company motto, which it is not).
- NAV ITEMS: replace current items with this exact order after the State toggle: Home, Products, About Us, FAQ's, How It Works. REMOVE 'Residential' and 'Business / C&I' as nav items (a single Products page now serves both). FAQ's is just a link; FAQ content already exists.
- YOUR STATE toggle: MOVE it to sit immediately after the logo, i.e. FIRST in the nav, ahead of Home. Goal: the user selects their state before anything else. (Two states only: VIC / NSW.)
- BUTTONS: keep 'Check your eligibility' and ADD a new 'Get a quote' button beside it. These two buttons now live only in the nav (see box 7).
- HEADLINE: set 'The accredited team that handles your entire upgrade.' on TWO lines. Move the three trust ticks (box 8) to sit directly BELOW the headline.
- DELETE this subheadline paragraph entirely ('From the first assessment ... you do almost nothing').
- REMOVE both hero buttons here — they now live in the nav bar (box 4).
- MOVE these three trust points (Accredited to create certificates / Re-tested every year / Running since 2009) to sit directly below the two-line headline.

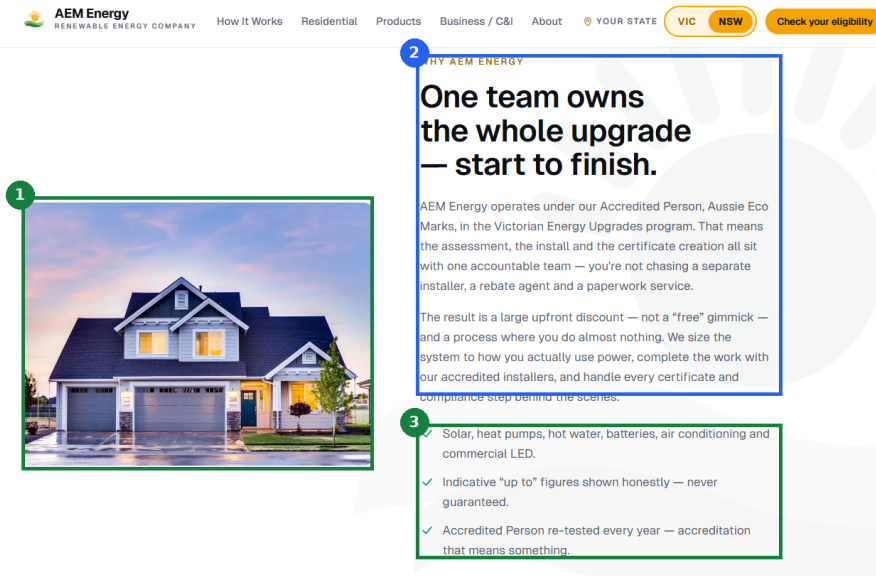

GLOBAL RULE: after every add/removal, re-adjust the section layout, spacing and background size so nothing is left cramped or with empty gaps. Hero background uses a left-side cutout so the photo never sits behind the text — this same cutout is the reference for the slide-ins on Home 5 & Home 6.

## Home 5 — One team owns the whole upgrade (Why AEM) · order 2

| ADD/RESTYLE | Image  | Convert to a full-section background; keep section informative.                       |
|-------------|--------|---------------------------------------------------------------------------------------|
| BEHAVIOUR   | Reveal | Background reveals LEFT → RIGHT on scroll, using the hero cutout so text stays clear. |
| ADD/RESTYLE | Copy   | Remove 'Aussie Eco Marks' mention.                                                    |

## HOME 5 — 'One team owns the whole upgrade' (WHY AEM ENERGY)

Final order position: 2 of 8 (immediately after the hero)

### CHANGES ON THIS SCREEN

- 1 Convert the small right-hand image into a FULL-SECTION BACKGROUND. Keep the section informative.
- 2 INTERACTION: the background image REVEALS from LEFT to RIGHT on scroll (begins off the left edge, resolves to the right). Use the hero cutout technique so the image never sits behind or interferes with the text side.
- 3 Remove the 'Aussie Eco Marks' mention in the body copy — AEM is an independent Accredited Person (global rule).

This is the WHY AEM ENERGY section and it comes first after the hero. GLOBAL RULE: re-fit spacing/background size once the image becomes a full-section background.

## Home 6 — Accredited installers. Real, tidy work. · order 3

| ADD/RESTYLE | Image  | Convert to a full-section background; keep section informative.                      |
|-------------|--------|--------------------------------------------------------------------------------------|
| BEHAVIOUR   | Reveal | Background reveals RIGHT → LEFT on scroll (mirror of Home 5), same cutout technique. |
| DELETE      | Link   | Remove 'More on our accreditation'.                                                  |

## HOME 6 — 'Accredited installers. Real, tidy work.' (DONE PROPERLY)

Final order position: 3 of 8 (after Home 5)

DONE PROPERLY

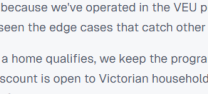

## Accredited installers. Real, tidy work.

Our registered installers do the work to the program's standard — and because we've operated in the VEU program since 2009, we've seen the edge cases that catch other providers out.

Where a home qualifies, we keep the programs distinct: the VEU discount is open to Victorian households and businesses, while a Solar Victoria rebate — the one layer with income and property thresholds — is applied separately for eligible homes. You'll always see which applies to you.

- ✓ VEU is not means-tested; only the Solar Victoria layer is.
- ✓ Metro & regional Victoria — one accountable team end-to-end.
- ✓ We explain exactly where the discount comes from before you commit.

2

3

[More on our accreditation →](#)

### CHANGES ON THIS SCREEN

- 1 Convert the right-hand image into a FULL-SECTION BACKGROUND. Keep the section informative.
- 2 INTERACTION: the background image REVEALS from RIGHT to LEFT on scroll (begins off the right edge, resolves to the left) — the mirror of Home 5. Same hero cutout technique so the text stays clear of the image.
- 3 REMOVE the 'More on our accreditation' link.

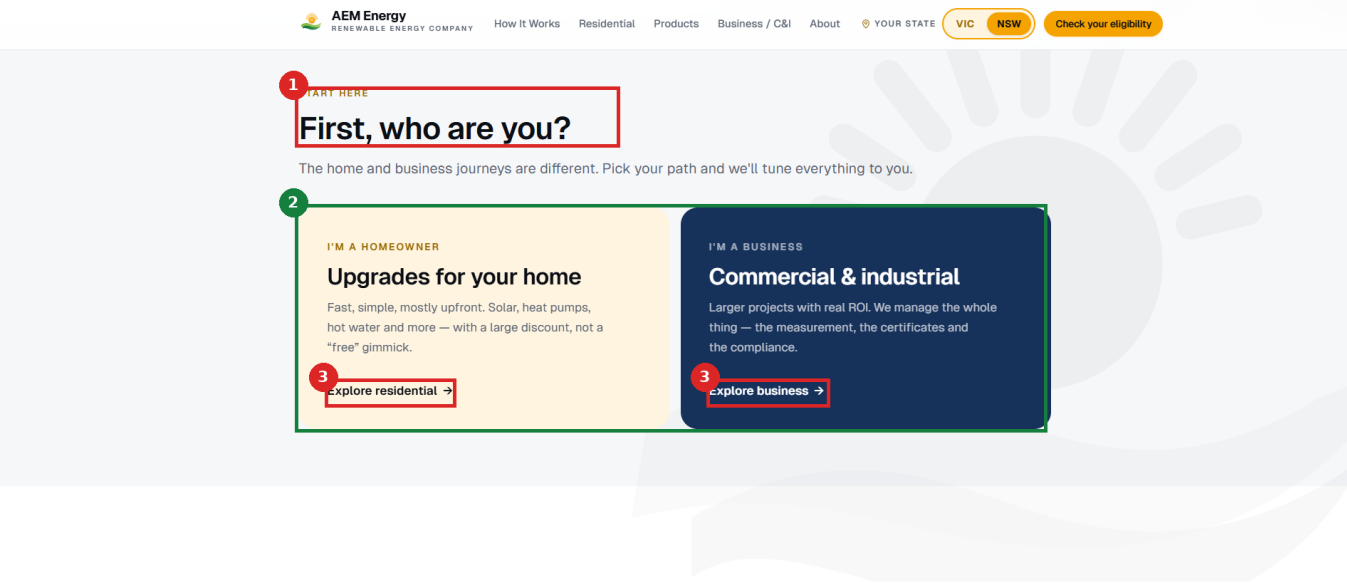

GLOBAL RULE: re-adjust spacing/background size after the image becomes a full-section background and the link is removed.

## Home 2 — Residential & Business info · order 4

|             |         |                                                                                                                |
|-------------|---------|----------------------------------------------------------------------------------------------------------------|
| DELETE      | Heading | Remove the 'First, who are you?' framing; stop it acting as a path-picker.                                     |
| ADD/RESTYLE | Section | Keep as an informative block on Residential + Business/C&I.; Copy TBC by client — leave a heading placeholder. |
| DELETE      | Buttons | Remove 'Explore residential' and 'Explore business'.                                                           |

### HOME 2 — RESIDENTIAL & BUSINESS INFO (was 'First, who are you?')

Final order position: 4 of 8 (after Home 6, before the 4-point reveal)

#### CHANGES ON THIS SCREEN

- 1 REMOVE the 'First, who are you?' heading/framing. This section must stop acting as a 'pick your path' navigation tool.
- 2 KEEP the section, but convert it into an INFORMATIVE block (we serve both Residential and Business / C&I). It informs, it does not route. Heading/copy is client-side and can be changed later — do not invent new copy; leave a heading placeholder.
- 3 REMOVE the 'Explore residential' and 'Explore business' buttons. No page-skipping shortcuts here.

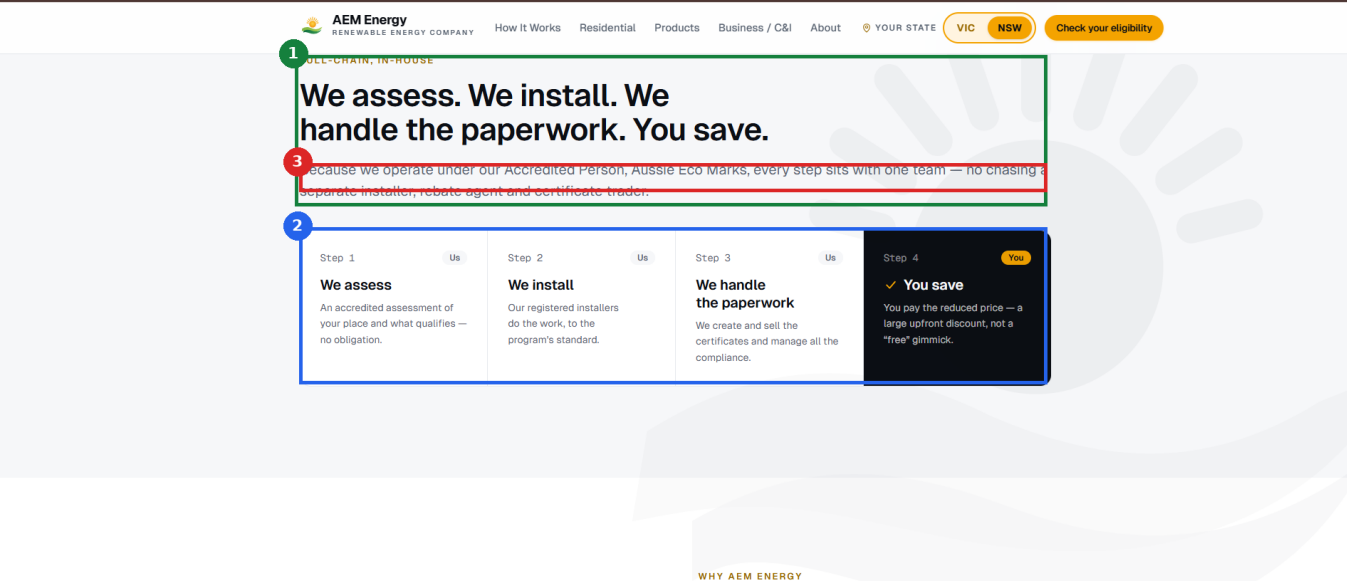

GLOBAL RULE: re-adjust layout, spacing and container size after the buttons and heading are removed so the two cards don't leave empty space.

# Home 4a — We assess / install / paperwork / you save · order 5

|             |             |                                                                                                                                                            |
|-------------|-------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
|             |             |                                                                                                                                                            |
| ADD/RESTYLE | Four points | Keep the content; rebuild the section (current layout looks templated).                                                                                    |
| BEHAVIOUR   | Reveal      | Scroll-driven: reveal each point one at a time with images accumulating on the right (point 1 → +image, point 2 → +image, etc.). See Home 4b for the look. |
| DELETE      | Copy        | Remove the 'Aussie Eco Marks' reference in the intro.                                                                                                      |

HOME 4a — 'We assess. We install. We handle the paperwork. You save.'

Final order position: 5 of 8 (after Home 2). REBUILD as a scroll-reveal.

CHANGES ON THIS SCREEN

- 1 KEEP the four points (Assess / Install / Handle the paperwork / You save) but REBUILD the section — the current static landscape layout looks like an AI template.
  - 2 INTERACTION: rebuild as a SCROLL-DRIVEN REVEAL. As the user scrolls, each of the four points is revealed one at a time, with image(s) appearing on the right. Point 1 reveals with its image; point 2 adds a further image; and so on across all four. See the Home 4b reference image for the intended look and reveal behaviour.
  - 3 Remove the 'Aussie Eco Marks' reference in the intro line — AEM is an independent Accredited Person in its own right (global rule).
- Home 4b ('Leading Sustainable Energy Solutions') is a DEV REFERENCE IMAGE ONLY — it is not a live section. It shows the desired look and the image-reveal-on-scroll behaviour for this section.

# Home 4b — REFERENCE IMAGE ONLY (not a live section)

|           |       |                                                                                                                          |
|-----------|-------|--------------------------------------------------------------------------------------------------------------------------|
|           |       |                                                                                                                          |
| BEHAVIOUR | Left  | Text points sit on the left — model for Home 4a.                                                                         |
| BEHAVIOUR | Right | Images sit on the right and accumulate — becomes Home 4a's on-scroll reveal. This screen is static; animate that layout. |

## HOME 4b — REFERENCE IMAGE ONLY (not a live section)

Style + reveal reference for building Home 4a

Professional and certified installation of energy-efficient systems.

✓

#### Custom Assessments

Free consultations to evaluate your specific energy-saving needs.

✓

#### Ongoing Support

Dedicated support to ensure optimal performance and savings

2

### CHANGES ON THIS SCREEN

- 1 Text points sit on the LEFT. Use this as the visual model for Home 4a's four points.
- 2 Images sit on the RIGHT and accumulate. In Home 4a this becomes the on-scroll reveal: each point brings in another image on the right. This screen is static; the ASK is to animate that layout on scroll.

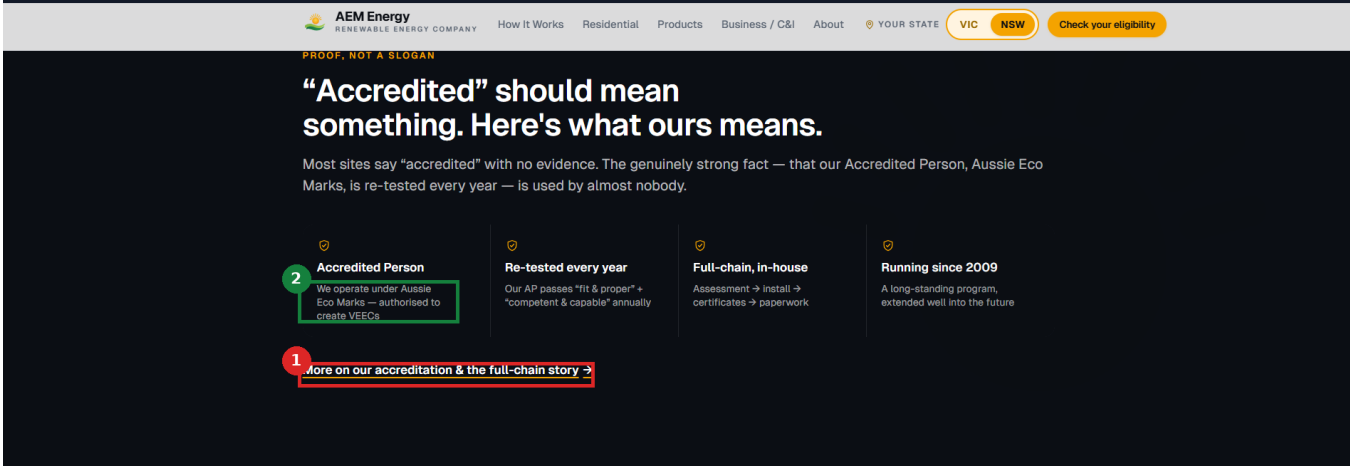

Do NOT build this as its own section. It exists only to show the developer how Home 4a should look and how the pictures should reveal.

## Home 8 — 'Accredited' should mean something · order 6

|             |           |                                                                    |
|-------------|-----------|--------------------------------------------------------------------|
|             |           |                                                                    |
| DELETE      | Link      | Remove 'More on our accreditation & the full-chain story'.         |
| ADD/RESTYLE | Card copy | Remove 'Aussie Eco Marks' wording from the Accredited Person card. |

**HOME 8 — "'Accredited' should mean something." (proof strip)**

Final order position: 6 of 8 (kept, per your final order)

### CHANGES ON THIS SCREEN

- 1 REMOVE the 'More on our accreditation & the full-chain story' link.
- 2 Remove the 'Aussie Eco Marks' wording in the 'Accredited Person' card — AEM is an independent Accredited Person in its own right (global rule).

CONFIRM BEFORE BUILD: earlier you asked to delete this section as a footer duplicate, but your FINAL order keeps it. Building it as KEPT per your final order. Flag if that was not intended. GLOBAL RULE: re-fit the section height after the link is removed.

## Home 9 — Find out what you qualify for · order 7

|             |         |                                                          |
|-------------|---------|----------------------------------------------------------|
|             |         |                                                          |
| ADD/RESTYLE | Section | Keep as-is; no changes. Sits directly before the footer. |

## HOME 9 — 'Find out what you qualify for.' (closing CTA)

Final order position: 7 of 8 (kept, before the footer)

**AEM Energy**

[Check your eligibility](#)

## Three programs. One combined value.

Most providers explain one rebate. Often you can combine three — the VEU discount, a Solar Victoria rebate and federal STCs — into a single, larger figure. Here's roughly how they stack for your situation.

**• VEU**

A certificate-based discount, applied upfront. Not means-tested — open to Victorian households and businesses.

**• Solar Victoria** Income-tested

A state rebate (and interest-free loan on some products) for eligible homes. This is the one layer with income and property thresholds.

**• STC**

Federal certificates created when you install eligible solar PV or solar/heat-pump hot water. Taken off your price upfront.

**1 Who's this for?**

☒ My home
 ☐ My business

**2 Which upgrades are you considering?**

Pick as many as you like — stacking is the point.

☒ Solar

☒ Heat Pumps

☐ Battery

☐ Air Con

**Indicative combined value** • INDICATIVE

up to **\$9,600**

Indicative range \$1,700–\$9,600 across your selected upgrades

|                  |                 |
|------------------|-----------------|
| • VEU            | \$500–\$3,000   |
| • Solar Victoria | up to \$2,400   |
| • STC            | \$1,200–\$4,200 |

### CHANGES ON THIS SCREEN

- 1 REMOVE the calculator from the homepage entirely.
- 2 MOVE it to the single Products page, shown BELOW the product listing. It must NOT appear on an individual product's detail/summary page (the page reached when one specific product is clicked).

The Products page is the single page that now serves both residential and business (products don't differ by type). Rebate figures are filtered by the selected state (VIC / NSW); if no state is selected, prompt for one before showing rebate values.
